- Express.js
- Node.js
- MongoDB
- MySQL
- GIT/GitHub

LANGUAGES

- English (Fluent)

PROFILE

I would describe myself as an industrious worker, somebody who already has the qualities to match the job description. Over the years, I've worked in roles where the need to collaborate closely with others is the norm. I believe I am a high achiever and I've also received positive feedback from the people I've worked with in previous roles. I am also a worker who is ready to go above and beyond of what is expected in my work, I would embrace change positively, and I would make sure you see a positive return on your investment.

WORK EXPERIENCE

GPRS Innovation Hub

2022 - 2023

Front-end Developer

- Deliver high-quality, productive code for diverse projects for clients
- Taught over 10 students the basics of frontend web development, helping them to understand HTML, CSS & JavaScript

Fix Impressions

2023 (Worked there for 7 months)

Graphics Designer

- Participated in designing unique magazines, invitation cards, flyers, and many more.
- Learned to use design tools like Corel Draw, Photoshop, and Adobe Illustrator.

SELECTED PROJECTS

Logistica

www.logistical-new.vercel.app/

Personal Project (Frontend Template)

Logistica is a front-end template project designed to showcase the benefits of optimized logistics in reducing transportation, storage, and inventory costs, ultimately driving higher profitability for businesses.

Ip Address Tracker

www.my-ip-address-tracker-react.vercel.app/

Frontend Mentor challenge

Track and visualize the geographic location of any IP address with ease using our React-based IP Address Tracker. Discover the precise location, ISP, and timezone while exploring a user-friendly interface designed for seamless navigation and information retrieval.
